

Core Maths

Supplementary Qualification

The Course

The Core Maths qualification is designed to support those learners who do not wish to take an A-Level in Mathematics, but whose other subject choices demand a good knowledge of Mathematics to a higher level. This could include science subjects, geography, psychology, law and many more. The qualification is completed in one year and would be chosen as a fourth subject. Universities place great value on the Core Maths qualification and may make a lower offer to students with this qualification.

Assessment

Paper 1 (40% of the course): Mathematical comprehension

Paper 2 (60% of the course): Application of Mathematics

Entry Requirements Careers & Higher Education

Students following a Science, Psychology or Economics course will be expected to study Core Maths if not taking A-Level Maths.

Study of Core Maths will support your studies in a variety of areas which require good mathematical skills. Many Universities will make lower offers for students who have studied Core Maths.

"The essence of mathematics is not to make simple things complicated, but to make complicated things simple."
